

EURO CONTAINER (KLT) MADE OF CORRUGATED CARDBOARD CONFORMING TO VDA 4530

FLEXIBLE KLT IN
MANY SIZES

DESCRIPTION

The Euro container (KLT) is a variable carton made of corrugated cardboard. Its good stacking characteristics and ease of handling mean the KLT is ideal for use in storage and shipping for a whole range of products. Moreover, it can easily be combined with plastic KLT boxes. It can handle a filling weight of 15 kg with ease. This alternative to plastic KLTs is especially suited to transport by air due to its light weight.

The KLT is available as a ready-assembled and glued version or from stock in a space-saving, self-assembly version. When handled with care and in accordance with instructions, the box can be reused multiple times. Because the KLT is made of corrugated cardboard, it can be disposed of without problem.

ADDED VALUE

SPACE SAVING - KLTs can be supplied flat, if required. Once assembled they are easy to stack, helping you save on storage costs.

FAST ASSEMBLY - The KLTs are quick and easy to assemble, saving you time and effort.

EASY HANDLING - KLTs made of corrugated cardboard can be used in combination with plastic KLTs without problem.

ECO FRIENDLY - The KLTs can be reused multiple times and are 100 % recyclable.

TECHNICAL DATA

A-Series	Size (Outer dimensions)
A6	296 x 196 x 150 mm
A5	395 x 296 x 285 mm
A4	395 x 296 x 150 mm
A3	593 x 395 x 285 mm
A2	593 x 395 x 230 mm
A1	593 x 395 x 150 mm

The A-series can be easily combined with plastic KLTs...

M-Series	Size (Outer dimensions)
M6	296 x 196 x 150 mm
M5	395 x 296 x 285 mm
M4	395 x 296 x 150 mm
M3	593 x 395 x 285 mm
M2	593 x 395 x 230 mm
M1	593 x 395 x 150 mm

...whereas the M-series can only be combined with corrugated cardboard KLTs of identical construction.
